

Dear partners from the industry

I am pleased to announce the upcoming **meeting of the European society for hemapheresis** which will be held from **April 8th to 10th, 2026** in **Prague** at the Grandior Hotel.

ATMPs (advanced therapeutic medicinal products) are the future therapeutic tool in a growing number of malignant and non-malignant diseases. This meeting will address the newest insights in CAR-T cell therapies. The indications have expanded from malignant hematological diseases to degenerative disease states. Impressive successes have been achieved in the treatment of autoimmune diseases. Also gene therapy is gaining more and more therapeutical relevance in a variety of inherited or acquired disorders. We also will welcome keynote lectures in novel indications of preparative and therapeutic hemapheresis. i.e new treatment protocols in extracorporeal photopheresis going in line with updated ASFA guidelines. This meeting will also cover relevant topics of transfusion medicine and will focus on both the donor and patient settings. Donor medicine is a crucial task in transfusion medicine. Donor eligibility testing must be independent from the patients' need. Donors become more important, not only the CD34+ and CD3+ donor, but also the voluntary blood donors as source for plasma derived medicinal products (PDMPs) and platelets. This event will offer educational and networking aspects for all attending professional groups. Well known national and international speakers will guide us through these exciting topics.

On behalf of the organizing committee I invite the industry partners to attend our meeting We thank you in advance for your continued support and we look forward to welcoming your participation as Sponsor or Exhibitor at the ESFH 2026 in Prague.

Please find attached our packages which offer you variety of sponsorship opportunites.

With kind regards
On behalf of the organizing committee
Gerda Leitner (congress president)
